

Craftsmanship Legacy

How one person can drive BIG results from very small, coordinated efforts

THE CONTINUOUS IMPROVEMENT MODEL

Tailoring · Warehousing · Transport · Manufacturing · Wholesale

Improvement Is a Way of Life, Not a Technique

“ *A foundation of simple, deliberate changes will yield remarkable results.* ”

A Foundation, Not a Fix

Built once, it keeps giving — long after the coaching visits end.

Small and Coordinated

Modest daily changes, aligned across the floor, beat grand programmes.

Remarkable Results

Measurable gains in cost, quality, speed and morale.

One Model. Every Operation.

The same discipline lifts performance wherever work is organised, handled and handed over.

Tailoring

Cut, fit and finish,
repeatable to standard.

Warehousing

Space, stock and flow
under control.

Transport

Turnaround, routing and
uptime.

Manufacturing

Line balance, quality at
source.

Wholesale

Order accuracy and cash
velocity.

If people, materials and time move through it, the model applies — and the returns look the same.

A Simple Road Map to Reclaim and Refill

Improvements

Better work, agreed and held to a standard.

Growth

Capacity released without new capital.

Cash Flow

Less tied up in stock, rework and delay.

Unseen Value

Value already inside the business, recovered.

Profitability

Margin protected at the point of work.

Productivity

More output from the same honest effort.

Reclaim what the process is quietly losing. Refill it with capability that stays.

The Journey: Seven Deliberate Stages

01

Beginning

A natural choice

02

Culture

Mindset first

03

Implementation

Floor walks

04

Empowering

Train and standardise

05

Visible Progress

5S and boards

06

Embedding

A core pillar

07

The Legacy

Pride and growth

STAGE 01

Beginning Continual Improvement

It starts with a natural choice — not a budget, not a committee.

Where the Journey Truly Starts

A Natural Choice

The decision to improve comes before any system. One person choosing to look again at the work is enough to begin.

Answers From the Floor

The production floor already holds the answers. Discover them where value is created, not where it is reported.

Minimal Resources Required

No heavy investment, no long approval cycle. The first improvements are funded by the waste they remove.

Changing the Culture of People

Encourage the Mindset Shift

Invite people out of the comfort zone. Encouragement, not enforcement, moves a workforce.

Monitor Small Daily Progress

Boards make yesterday visible today. What is seen is what improves.

Create Shared Ownership

Excitement follows ownership. When the gain is theirs, the effort is theirs.

“ Culture is the first constraint you meet — and the first breakthrough you earn.

Equipment can be bought. Mindset must be built.

Consistency and Floor Walks

Keep the cycle simple. Keep it turning.

Observe From the Floor

Avoid lengthy conversations in meeting rooms. Decisions improve where the work is visible.

Coaches Who Visit Often

Expert coaches make frequent visits and emphasise learning by doing, not learning by slide.

A Simple P-D-C-A

Plan, Do, Check, Act — kept deliberately simple so every team can run it unaided.

Ground Involvement Is Key

Success belongs to the people on the ground. Their involvement is not optional; it is the method.

Training Within Industry and Standardisation

75% less time to reach competency

Experienced Teams Empower Newcomers

Knowledge moves deliberately from the people who hold it to the people who need it.

Standardised Methods and Accountability

One agreed way to do the task, with clear ownership attached to it.

System Reliability Is Elevated

Output stops depending on who happens to be on shift.

Teams Take Charge of Growth

People come to enjoy learning — and take responsibility for what comes next.

5S and Vision Boards

1S Sort

Remove what the work does not need.

2S Set in Order

A place for everything, in reach.

3S Shine

Clean to inspect, not to impress.

4S Standardise

Agree the way; write it down.

5S Sustain

Hold the gain; audit lightly.

A Clear Flow of Processes

5S makes the intended flow obvious — and every departure from it obvious too.

Waste Eliminated at Source

Unnecessary motion, stock, waiting and rework are removed where they are created.

Boards Track the Whole Operation

Performance is visible across operations, every shift, without a report being written.

Boards Motivate Everyone

Small progress confirmed daily builds shared ownership and real excitement.

Not a Project. A Core Pillar.

A Permanent Pillar

Not a temporary project. It is built into how the business is run.

United in Responsibility

The team is joined in shared responsibility and ongoing growth.

A Celebrated Accomplishment

Improvement stops being a demand and becomes a thing to mark.

Assured Forward Growth

The business keeps moving forward, with growth that is expected.

Once embedded, improvement no longer depends on any single champion.

What People Say It Became

“

More than a methodology

With the right mindset and expert guidance, it stops being a system and starts being a standard.

“

A way of thinking

Empowerment reaches every individual, from the newest hire to the longest-serving hand.

“

A resilient workforce

Engaged, capable and steady, because the work is understood, not merely followed.

“

Optimised operations

Waste out, flow in. The operation does more with what it already has.

“

Sustainable success

Positioned for success that holds through cycles and seasons.

“

It is a pride

Finished work becomes a standard the whole team defends.

What Changes for the Owner

BEFORE

- ✗ Competency takes up to twelve months
- ✗ Waste hidden inside normal routine
- ✗ Improvement owned by management alone
- ✗ Progress invisible between reports
- ✗ Output depends on specific individuals
- ✗ Growth hoped for, rarely assured

AFTER

- ✓ Competency reached in about three months
- ✓ Waste removed at the point it is created
- ✓ Improvement owned by every team member
- ✓ Progress confirmed visibly, every day
- ✓ Reliable output from a standardised system
- ✓ Growth assured and continuously compounding

Reclaim. Refill. Repeat.

Continuous improvement becomes a celebrated accomplishment — and keeps the organisation moving forward with assured growth.

Choose to Begin

Name one process and one owner this week.

Walk the Floor

Observe, ask, and record what you actually see.

Standardise and Sustain

Agree the method, train to it, hold the gain.

Thank you.

NEXT STEPS

Bring the Craftsmanship Legacy Model to Your Operation

Three easy ways to start with CINA — pick the path that matches where you are today.

Register: Next Onboarding Breakfast

Join a relaxed, in-person morning session to meet the CINA network, hear real case studies, and learn how the model applies to your operation.

RESERVE MY SEAT

Try a Free Operation Assessment

Get an expert walk-through of your floor, warehouse or fleet to surface quick wins — at no cost, with no obligation.

BOOK MY ASSESSMENT

Register: Onboarding Low-Investment Cohort Training

Join the next low-cost cohort and train your team to run PDCA, 5S and standard work — with a coach guiding every step.

JOIN THE COHORT

Ready when you are — reach out to the CINA team to get started.
