

Business Excellence Is Your **Key Priority**

An invitation to the owners, chief executives and directors who intend to grow the value already sitting inside their business.

THE THEME

Reclaim **it** — Refill **your potential**

Building business through the practice of continuous improvement and excellence.

WHY THIS CONVERSATION

Most businesses do not fail for want of effort. They leak value quietly — through waiting, rework, unclear ownership and cash trapped in the wrong places. None of it appears as a line in the accounts, yet all of it is paid for.

This round table rests on a single idea: the value you are looking for is already inside the business. Continuous improvement is the disciplined practice of recovering it, then refilling the organisation with capability that stays.

THE SESSION AT A GLANCE

Who Should Attend

Chief executives, managing directors, owners and heads of department committed to sustainable growth.

What You Get

Practical frameworks, candid peer insight and strategies you can act on the same week.

The Format

An executive breakfast with facilitated dialogue, real case sharing and unhurried networking.

“Your refreshing morning with real return on investment.”

CINA EXECUTIVE BREAKFAST • STRUCTURED DIALOGUE

Seven Shifts From Leaking Value to Compounding It

Each shift is taken on its own terms: what it looks like working, what it costs when it is not, and the first move to make.

OPERATE

Make Your Operations Optimal

- Reduce waste wherever it is created
- Establish a clear, visible process flow

RECLAIM

Reclaim the Productivity of Your Team

- Build a staff brand identity people own
- Put the right people in the right seats

REFILL

Refill Your Financial Management

- Run a clear accountability process
- Optimise cashflow, not just profit

CUSTOMER

Elevate the Experience Customers Get

- Treat customer experience as revenue
- Optimise the full customer journey

SELLING

Sharpen Selling & Market Intelligence

- Pursue consistent, repeatable revenue growth
- Read the market deliberately, not anecdotally

DATA

Build Real Data Intelligence

- Create visibility of the numbers that matter
- Make better decisions through insight

SUSTAINABILITY

Adopt a Sustainability Framework (ESG)

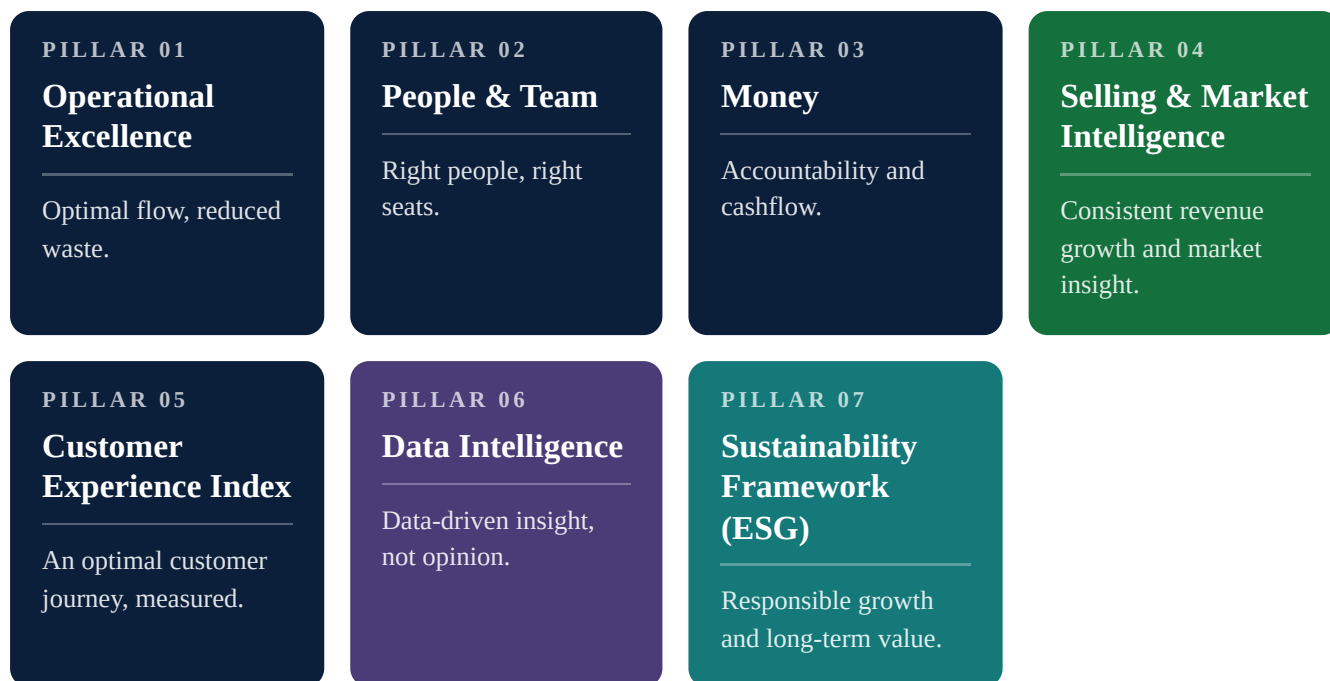

- Environmental responsibility built into the work, not bolted on afterwards
- Social impact that strengthens your licence to operate
- Governance excellence that reassures partners and lenders

Small, coordinated efforts, held to consistently, outperform large programmes launched once and quietly abandoned.

The Seven Main Pillars

Seven pillars hold the shifts together — the standing framework CINA uses to assess, improve and sustain performance.

THE MORNING

Reclaim it. Refill your potential.

ATTEND

Structured dialogue with a real return on investment
