Business Continuous Improvement Africa (BCIA) — equipping leaders, teams and organisations across Africa with world-class tools for productivity, quality and sustainable growth.

LEAN & SIX SIGMA

SAFETY & ESG

LOGISTICS & SUPPLY CHAIN

WHO WE ARE

Business Continuous Improvement Africa

Business Continuous Improvement Africa (BCIA) is CINA's flagship capacity-building initiative, designed to strengthen the operational, financial and strategic performance of organisations across the continent. Through structured executive engagement, cohort-based learning and hands-on consultancy, BCIA builds a practical bridge between global best practice and the realities of African industry — helping organisations reduce waste, protect margins and build durable, investable operating systems.

Our curriculum spans safety and sustainability, Lean and Six Sigma-driven operational excellence, and end-to-end logistics and supply chain management — delivered by practitioners to leaders, managers and frontline teams who run the business day to day.
